

Create a new Power BI Desktop file, and load the Excel workbook in the above folder into it. Use this to create the following donut chart:

Here we've moved the legend to the left centre, set a title and customised data label settings.

Now right-click to exclude **South Asia** and **East Asia & Pacific** from your chart (they're too big), and turn it into a tree chart looking similar to this:

Here we've made the colours a bit pastellier (is there such a word?).

Save this file as **Donuts and trees**, then close down this instance of Power BI Desktop.
