

Open the Power BI report in the above folder:

List of pizzas		
Pizza	Type	Calories
American	Classic	1019
American Hot	Legera	548
American Hot	Romana	1010
Calabrese	Romana	1275

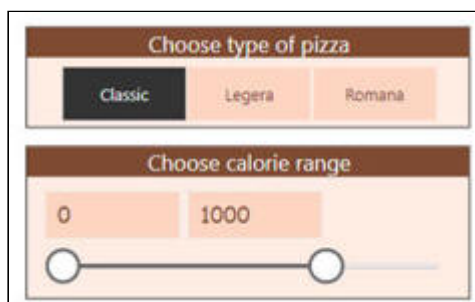

*Initially the report just lists out every pizza served by Pizza Express (as of March 2019).*

You don't want to be a pig! Add a numeric slicer allowing you to limit the calorie choice you face:

*Limit your choices to pizzas having up to 1,000 calories.*

You don't want to be a pig, but you don't want someone to have stolen the middle of your pizza either. Add a slicer allowing you to choose by pizza type:

*Make your slicer horizontal, and select **Classic**.*

It's surely got to be a **Sloppy Guiseppe!**

List of pizzas		
Pizza	Type	Calories
Fiorentina	Classic	942
La Reine	Classic	898
Margherita	Classic	834
Sloppy Giuseppe	Classic	897
Vegan Giardiniera	Classic	843
Veneziana	Classic	938
Total		5352

*The remaining choices.*

Save this report as **Slicer Pizza**, then close it down.
