

Open the Power BI report file in the above folder:

Choose to open an existing report (so you're opening an existing .pbix file, NOT getting data in a new report).

This file contains a table listing out the top websites in the world as of March 2019:

Ranking	Site	Domain	Type	Principal country	Continent
1	Google	google.com	Internet services and products	U.S.	North America
2	YouTube	youtube.com	Video sharing	U.S.	North America
3	Facebook	facebook.com	Social network	U.S.	North America
4	Baidu	baidu.com	Search engine	China	Asia

No huge surprises in the top 3 or 4!

Create a matrix analysing these as follows:

Top websites as of
March 2019
according to
[Wikipedia](#)

Type	Asia	Europe	North America	South America	Total
Blogging			1		1
E-commerce	2				2
E-commerce and cloud computing			1		1
Employment-oriented Social network			1		1
Encyclopedia			1		1
Film, TV show, and video game database			1		1
Instant messaging			1		1
Internet security and search engine	1				1
Internet services and products	3	8	1	1	13
Online auctions and shopping			1		1
Online office suite			1		1
Online shopping	4				4
Total	22	13	33	1	69

This matrix has a title and coloured totals.

On another page, create a matrix summarising the number of websites by continent and country:

Top websites by location	
Continent	Count of Site
<input checked="" type="checkbox"/> Asia	22
<input checked="" type="checkbox"/> Europe	13
France	3
Germany	1
Italy	1
Russia	5
Spain	1
Turkey	1
UK	1
<input checked="" type="checkbox"/> North America	33
<input checked="" type="checkbox"/> South America	1
Total	69

The expand/collapse icons should be added automatically when you include more than one row field in your matrix.

Save this report with the same name, then close it down.
