

Create a new Power BI report, and from the **Make-a-Mammal** database load these tables:

Make-a-Mammal [11]

☐

tblBalance

☐

tblCalendar

☒

tblCentre

☒

tblCentreType

☒

tblEnvironment

☒

tblFamily

☒

tblHabitat

☒

tblProduct

☒

tblPurchase

☒

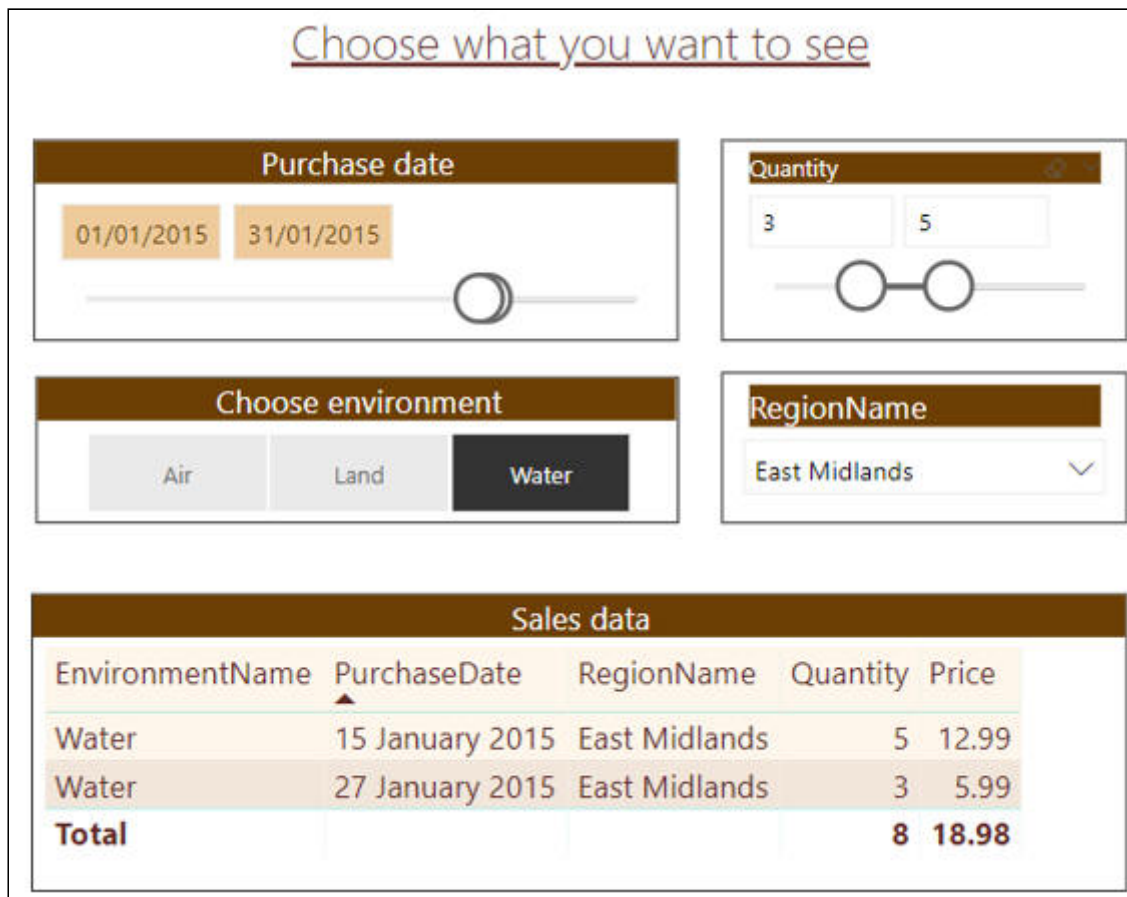

tblRegion

☒

tblTown

Tick these tables to import them into your new report.

Create a report containing as many of the following slicers as you have time for!

*This report contains a date, numeric, horizontal and dropdown slicer! The report shows that there were 2 sales in January 2015 in the **East Midlands** region for the **Water** environment where the quantity sold was between 3 and 5.*

Save this report as **Various slicers**, then close it down.
