Open the Power BI report in the above folder.  It should contain Abba songs released in the 1970s and 1980s:

| Song title | Album | Release Year |
|---|---|---|
| Andante, Andante | Super Trouper | 1980 |
| Angeleyes | Voulez-Vous | 1979 |
| Another Town, Another Train | Ring Ring | 1973 |
| Arrival | Arrival | 1976 |

*The order may not be the same, but the report contains nearly 100 bundles of Swedish goodness.*

Create a column chart to compare the number of songs released in each year:

Axis

Release Year          ∨ ✕

Legend

Add data fields here

Values

Count of Song title      ∨ ✕

*The fields you'll need for your column chart (see below for what it should look like).*

Format the chart so that it looks something like this:

*The chart has a title, X axis title and Y axis title, and someone has changed the **Data colors**.*

Save your report as **What happened in 1978**, then close it down.
