Open the Power BI report in the above folder. The data shows the number of completed tests by exam for each month of 2018 from the Wise Owl skills assessment site:

ExamName	Month number	Month name	Tests taken
Word 2007	10	October	82
Excel 2007/2010	8	August	509
Word 2007	9	September	242
Basic computing skills (old)	2	February	145
PowerPoint 2003	8	August	1
Word 2007	4	April	236

For example, 82 tests were completed for Word in October 2018.

Create a waterfall chart showing for each month the two leading causes of a change in the number of tests taken (with everything else lumped together as **Other**):

*Unsurprisingly, the yellow **Other** category is often the biggest.*

Save this report as **May the force be with you**, then close it down.
